The difference between SaaS and Open Source Platforms

	SAAS	OPEN SOURCE
Ease of Launch	Easy for beginners. You can create a website intuitively	Easy launch in case you have at least some technical knowledge
The level of technical knowledge to manage the admin panel	Little or no technical knowledge needed	Requires at least basic or professional technical knowledge
The necessity of a development team	No development team or one developer for technical support	Requires professional developer's help
Features and Customizability	Basic features included, difficult and too expensive to customize	Basic features included, complete customizability
SEO capabilities	Available	Available
Security	SaaS platform provides maintenance and security	You have two options: to take care of security on your own or to use the feature of the platform for an extra fee
Scalability	Scalable within limits of its plans	Scalable with hardly any limits
The Cost	Fixed Annual cost from Rs. 30,000/- to Rs. 20,40,000/-	The source code is free but there are always extra expenses for maintenance, security, and hosting with Annual cost from Rs. 60,000/- for 1st year, from 2nd year, the cost will be Rs. 25,000/-
